

Aggro-Wawi Plugin für PayJoe®

Installation

1. Download the *.zip or clone the repository
2. Copy the contents into your AggroWAWI installation (contents of `src` into AggroWAWI `src` dir)
3. Register the bundle in the file `app/bundles.inc.php`

```
<?php

function get_bundles()
{
    return array(
        new Aggrosoft\ShirtnetworkBundle\AggrosoftShirtnetworkBundle(),
        new NetConnections\PayJoeExport\PayJoeExportBundle()
    );
}
```

4. Append routing info to `app/config/routing.yml`

```
#...

payjoe:

    resource: "@PayJoeExportBundle/Resources/config/routing.yml"
```

5. Clear the symfony cache
System management => Update => Empty cache
6. Login again, select the correct client
System management => Plugins => PayJoe Exporter
Enter the generated PayJoe credentials.

Console Commands

The plugin adds new commands to the symfony console. Pass `--help` for a detailed explanation.

Start an export from the command line.

```
php app/console wawi:payjoexport
```

Cancel a pending or running job.

```
php app/console wawi:payjoexport:cancel <JOB_ID>
```

To cancel all running or pending jobs use `all` as the job ID.

Export data relevant for PayJoe as CSV

Mainly for debugging purposes to see what will be transmitted to PayJoe.

```
php app/console wawi:payjoexport:csv
```
